

IMAGE VAULT® EZ

True digital video has never been more accessible.

Image Vault EZ 4000, 8000, and 1600. Easy installation, setup, and pricing: if you're thinking about a switch to DVR security, here's your answer.

Now, switching to a digital video recording system is virtually a no-brainer in every sense. With our new Image Vault EZ models, you can replace an old VCR system in minutes, at a very affordable price. No multiplexers, no installation hassles, no programming required: just plug in your existing cameras, answer nine questions in Image Vault's Windows®-based Setup Wizard software, and you're ready to go.

All the critical features of a true DVR:

Remote Access – Allows for remote viewing of live and recorded images anytime, anywhere – if you can dial in via standard phone line or network connection, you're there.

Internal Motion Detection – Extends hard-drive storage capacity by an average of 50%.

Triplex Operation – Image Vault units record continuously, without interruption – even during event playback or live viewing.

Multifunction – No tapes, VCRs, switchers, or multiplexers. Just Image Vault EZ and your existing cameras have you covered.

Easy Downloads – Data can be transferred to EZ's built-in CD-R in minutes. Images can also be emailed, printed, or viewed remotely.

Auto Reboot – Image Vault will automatically reboot in the event of a power failure.

More features, more advantages, more capability: at one of the industry's best values.
