

THE VALUE OF POINT OF SALE AT A FRACTION OF THE PRICE

The HP rp3000 Point of Sale System helps you focus on moving your business forward

In order to keep your business going—and growing—you need a reliable system that works for you day in and day out. Designed to meet the challenges of your store's environment with retail-ready components not found on a PC, the HP rp3000 Point of Sale (POS) System features powerful processing, a durable form factor and a three-year standard warranty to help you concentrate on your business—not your POS system.

Flexibility meets functionality

When you need a platform for a POS solution to process customer transactions, a range of inputs allows you to re-use your existing serial accessories and migrate to USB peripherals at your own pace. The HP rp3000 POS System gives you the flexibility to standardize on the same hardware and image throughout your store.

Reliable and retail-ready

Giving you incredible durability, the HP rp3000 POS System boasts a steel chassis and extensive on-board

monitoring and alerts in a compact form factor that can be used above or below the counter. In addition:

- Oversized cooling enables longer continuous operation in an ambient 40°C/104°F environment.
- Efficient, low-powered Intel® Atom™ processor uses less energy, helping you save on energy costs.
- A lockable front cover and no front ports keep your data and receipts more secure and help prevent tampering.
- Extreme environmental and shock testing help ensure reliability during the long-term wear and tear typical of a busy, rugged retail environment.
- Added durability helps extend your POS system's life so you don't have to worry about replacements or upgrades

HP service meets total support

Let HP take care of its products so you can take care of your business. HP and our valued partners provide worry-free maintenance with a standard three-year warranty on full hardware bundles for end-to-end service in one phone call—take care of your POS system and your HP peripherals all at once.

* Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwarereqs.mspx and www.microsoft.com/windowsvista/getready/capable.mspx for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.

1. Windows Vista Business disk also included for future upgrade if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order at least 25 customer systems with the same custom image.
2. Intel's numbering is not a measurement of higher performance.
3. Dual channel memory configurations supported for enhanced performance (requires both slots populated with same type and size memory).
4. GB = 1 billion bytes. Actual formatted capacity is less. Up to 8GB is reserved for system recovery software 3. GHz refers to internal clock speed of the processor. Other factors besides clock speed may impact system and application performance.
5. 16X MAX DVD+/RW Drive data transfer rates up to 6000 KB/s (CD) and 22,000KB/s (DVD).
6. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media.
7. LightScribe creates a monochrome image. LightScribe media required and sold separately.
8. The Computrace agent is shipped turned off, and must be activated by customers when they purchase a subscription. Subscriptions can be purchased for terms ranging from one to four years. Available in the United States only.
9. Service levels and response times for HP Care Packs may vary depending on your geographic location. Restrictions and limitations apply. For details, visit www.hp.com/go/carepack.
